# GLOPIOUS

In the 21st century the style trends of the fashion industry dominate the world more than they ever before and control not only the way people dress but also the way they think. With their sleek lines and perfect silhouette, clothes in the 21st century are not only sexy and flirty and sensual, it is a kind of a statement and they are even more prominent than ever before. Fashion is not only a way of life, and the way it is designed is a reflection of the way they think, so we can say that the way fashion is not just a means of clothing, but it is the symbol of their personality and their lifestyle. And because they are well aware of the power they hold, designers and models for the 21st century are more sophisticated than any other generation in the world.
